MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with Chet Cooper - Missile Gap

Mr. Chet Cooper, Office of the DD/I, called to advise that at the White House staff meeting this morning reference was made to the whole problem of the "missile gap." The discussion apparently indicated that while things were fairly well under control as to the substantive area, the President is interested in Congressional action that was taken on this subject. It appears further that the President is desirous of receiving an outline of Congressional appearances on the subject of the missile gap: who made them; what was covered; and before what committees. In response to a question of time, Mr. Cooper indicated at the end of the week is desirable.
